## KEYWORDS

COVID-19; testing strategy; skew-normal distributions; lockdown; forecast; modeling; outbreak; infectious disease; prediction

*This is a peer-review report submitted for the paper "COVID-19 Testing Strategies and Lockdowns: The European Closed Curves, Analyzed by Skew-Normal Distributions, Forecasts for the United Kingdom, Sweden, and the United States, and the Ongoing Outbreak in Brazil."*

is quite enlightening, showing how the available data should be interpreted and used to improve health systems' response to the crisis and explaining why the working strategies of countries like Germany and South Korea are so effective. I fully support the publication of this paper. I suggest only a more careful review to correct a few typos in the main text. Other than that, I endorse this paper's publication.

## Round 1 Review

---

### General Comments

This paper [1] is very interesting and approaches the problem at hand with an innovative perspective. The statistical analysis

### Conflicts of Interest

None declared.
