Keywords: access to health; health service utilization; eye care use; health-seeking behavior; sociodemographic determinant; visual impairment; social support; women empowerment; education; eye care; pediatric; eye; ophthalmology; visual; ECU; eye service; utilization; Malawi; empowerment; health service use; use

This is the peer-review report for “Eye Care Service Use and Associated Health-Seeking Behaviors Among Malawian Adults: Secondary Analysis of the Malawi Fifth Integrated Household Survey 2019-2020.”

The English is not good throughout the document, and the writing could be much more succinct and precise.

Round 1 Review

Potentially an interesting paper [1], but more details are needed in the methods to enable the reader to understand the results.

Conflicts of Interest

None declared.
